

ANH NGO NGUYEN TRAN

San Diego, CA | (470) 538-4524 | nnt003@ucsd.edu | linkedin.com/in/anh-tran-0a347018a/

Data Science student with experience building data pipelines, predictive models, and analytics solutions using Python and SQL. Hands-on experience across data engineering, machine learning, and large-scale data analysis, with interests in data engineering, cloud infrastructure, and data-driven business solutions.

EDUCATION

University of California, San Diego

B.S. Data Science, Minor in Business Analytics and Mathematics

Expected Mar 2028

Honors: Provost Honors

De Anza College

A.S. Mathematics; A.S. Economics

Jan 2023 – Mar 2025

GPA: 3.98/4.00 | Honors: Dean's List, All Quarters

SKILLS

Technical: Python (pandas, NumPy, scikit-learn, XGBoost), SQL, PostgreSQL, Go, Docker, REST APIs, GeoPandas

Data: ETL, data pipelines, data modeling, machine learning, feature engineering

Tools: Tableau, Excel, Git/GitHub, Jupyter, Streamlit

EXPERIENCE

Data Engineer Intern — NeuroLeap Corp

June 2026 – Present

- Built and maintain the **NeuroLeap backend** using Go, PostgreSQL, Docker, and REST APIs, including user authentication and database migration/deployment workflows.
- Designing a **wide/OBT** (one-big-table) schema that transforms raw motion records into **ML-ready features** for analytics and model development.
- Developed motion-data processing and validation pipelines to parse, normalize, and clean sensor CSV/TXT files, with automated bad-row detection and **rejected-record reporting**.

Data Scientist Intern — IDX Exchange

June 2026 – September 2026

- Developed an end-to-end machine learning pipeline using nearly **800K CRMLS property records** to predict California single-family home sale prices.
- Trained and optimized a **CatBoost regressor** on **128K+ properties**, achieving $R^2 = 0.904$ and **8.55% median absolute percentage error** on an untouched test set.
- Benchmarked Linear Regression, Decision Tree, Random Forest, XGBoost, and CatBoost, reducing **MAE by 9.7%** versus tuned XGBoost through model selection and feature engineering.
- Built a leakage-aware, time-based preprocessing pipeline and enriched property data through **GeoPandas spatial joins** with California school-district boundaries, alongside missingness indicators, log transformations, and ratio features.

Data Analyst Intern — IDX Exchange

Mar 2026 – June 2026

- Cleaned and validated **1.38M+ MLS listing and sold-property records** in Python and SQL, flagging **878,796 records (63.6%)** for missing values, invalid dates, or outliers.
- Built 2 interactive Tableau dashboards (Market Analysis, Competitive Analysis) and delivered a 1-page Market Intelligence Report distilling **3–5 data-driven insights** for stakeholders.
- Engineered market metrics (price ratio, price-per-sq-ft, days on market) and applied IQR-based statistical outlier removal to improve dataset reliability ahead of dashboarding.

Undergraduate Research Assistant, Economics Lab — UC San Diego

Apr 2026 – June 2026

- Supported the **Talen Project** (advised by Dr. Idaliya Grigoryeva), cleaning and validating academic/demographic datasets in Python and Excel to examine student achievement and socioeconomic factors behind hidden academic potential.
- Reviewed and synthesized **30+ academic papers and datasets**, extracting key variables and methods that shaped the research analytical framework.

PROJECTS

Google Reviews LocalLens — Data Science Student Society, UCSD

Jan 2026 – Mar 2026

- Analyzed **1M+ Google Maps reviews and business metadata** across U.S. cities and categories to compare customer sentiment, business quality, and market opportunity.
- Built an opportunity-scoring model using rating patterns, review volume, and competition levels to surface underserved market segments for potential business entry.
- Standardized and engineered **3,000+ overlapping business categories** across a multi-GB dataset, enabling apples-to-apples cross-market comparison; presented findings at UCSD DS3 DINO CAGE.

ADDITIONAL EXPERIENCE

ITS Student Technician — UC San Diego

Aug 2026 – Present

- Troubleshoot and resolve hardware, software, account-access, networking, and campus-system issues across phone, ticketing, and onsite support channels for **UC San Diego's 40,000+ users**.

Club President — Mathematical Investment and Trading Society (MITS)

Jun 2024 – Mar 2025

- Led a **6-officer team** to launch the club's first stock-analysis competition, creating a new hands-on investing track for members.
